

Nexa Aluminium push buttons panel

Reference: NAP
Product code: NAP

Main characteristics

- Nexa is the flagship modular panel from Golmar. Its lateral profiles not only makes the panel more robust, but gives the sensation it is floating on the wall. Much more than just a piece of metal.
The 1.8mm thick aluminium of the modules, and 4mm thick of the lateral profiles, ensure bond strength between the door panel modules. The anodized treatment makes it easy to clean.
Nexa frames are available in four different heights, for one, two, three and four modules. Frames can be horizontally linked to create the largest possible configuration of panels. Thanks to a wide variety of modules and accessories, you will be able to create the door panel that best matches your project.
Enjoy Nexa and do your job with ease. The internal modules, with detachable connectors, easy connections through flat cables and pre-wired push buttons will save you effort, time and money.

Additional information

The main mechanical features of Nexa Aluminium modular panels are:

- Front of 1.8mm. thick anodized extruded aluminium.
- Wall frame where electronic modules are to be inserted.
- Informative / camera window manufactured in polycarbonate.
- Interchangeable single or double push buttons with stainless steel cover.
- Steady illumination at the door panel through white leds.
- Closing heads and lateral profiles.

To configure a door panel:

- Select a N1xxx grille module.
- Add NX3xxx push buttons modules to obtain the desired number of push buttons. If required, access control modules can be also added. If your option is a coded door panel, refer to the information provided with the specific audio or video module.
- The maximum number of modules vertically placed is four; there is no limit for the number of modules to be placed horizontally. Select a embedding box and one N600x/AL assembling set according to the number of modules vertically placed.
- In case of door panels with more than one horizontal module, order as many embedding boxes as horizontal modules the panel has. Use UC cable tunnels and N601x/AL assembling sets to attach them.

Once the door panel has been selected, complete it with the corresponding electronic modules, which will depend on the installation type:

- 4+n analogue audio installation: EL655.
- "2Plus" audio digital installation of 2 wires: EL620/2Plus.
- "G2+" audio digital installation of 2 wires: EL642/G2+.
- "G2+" video digital installation of 2 wires: EL632/G2+.
- "Plus" audio digital installation of 4 wires: EL642/Plus.
- "Plus" video digital installation of CAT5 or 3 wires + coaxial cable: EL632/Plus.
- IP video digital installation: EL632/G+/48 IP DUAL POE.
