

Show-room Golmar with the last innovations in home automation and WIFI video door intercom

Our client Suministros eléctricos MTP de Móstoles inaugurates a SHOW-ROOM in their facilities with the latest developments, **YOKIS** home automation system and WIFI solutions in 2-wire video door entry. Home automation solutions scalable, economical controlled from devices and multiple platforms: touch screen, voice assistants (Google Home and Alexa), pushbuttons or from any smartphone or tablet from the dedicated APP YnO.

In the same way, and through application we will be able to interact with the video door entry system of home.

This technology allows to manage the call coming from the panel by using a smartphone device thanks to the G2call app. In addition, the system has a key reader integrated in the board, as well as the capture of images through the 7" touch screen, among other features.
