

## Intersec Dubai 2022

Golmar has participated in Intersec 2022 expo in Dubai, from January 16-18th. Intersec is currently the most important residential and commercial security event in the country. In this edition, still with the pandemic global situation, Golmar is proud to say it's been the only one intercom and video intercom spanish representation in the event.

This year, Golmar has shown its new two-wires G2+ and IP G+ technology video intercom products.

The main products are the new **ART 4TH** and **ART 4 LITE Black Edition** indoor units, that will consolidate in the G2+ technology and will be integrated in installations along with our innovative **Soul/Access** door panel, also presented in the event.

Talking about IP G+, Golmar has shown the ART 7AW indoor unit, based on the Android platform, that in addition to ART 7W features, will include apps to integrate home automation, alarms and the CCTV system.

Golmar keeps innovating its range of products, Intersec is the best showcase to present and show our video intercom and security ideas and solutions. Thank you all for visiting us and we hope to see you again in the next edition.
